

- Automotive & Tractor Parts
- Tractor & Agricultural Parts

COMPANY PROFILE

'SK' a name founded way back in 1965, has grown from a small family run company to one of country's leading manufactures of automotive spare parts; Tractor parts and agricultural implements.

Now, S.K. Manufacturing Co. is leading manufacturer of Automotive, Tractor spare parts and Agricultural implements of India and are located in the industrial town in Jalandhar in the state of Punjab. The Plant is modern, having all requisite manufacturing facilities as also a well engineered utility section.

The secret of our success is the uncompromising business standards of its management and the company's unrelenting focus on quality. We have scientifically laid out modern machinery, which is run under the guidance of qualified experienced engineers, by a team of well trained motivated workers in bright, way of neat working conditions. In our company whole of process, from pattern and die making to finishing of goods, are carried out under one roof.

For us " the interest of the consumer is the top priority and therefore "Quality is our creed".

That is why each product is made from the finest materials and is subjected to stringent, rigorous checks and inspection by qualified engineers with latest inspection tools at every stage of manufacture.

We have a large number of dealers throughout India who sell 'SK' automotive parts with confidence. They are served by an army of technically trained sales representatives.

QUALITY TESTING

The company has its own Research & Development Centre where continuous efforts are undertaken to improve the product quality and manufacturing systems. Every possible effort has been made to make use of the technology and the most sophisticated equipment to ensure that the customer is given the maximum value.

Total Quality Management is an approach that aims to achieve quality by organizing every process to get the product 'right first time' and prevent mistakes ever happening. This is also known as a 'zero defects' approach.

This is a specific approach to quality assurance that aims to develop a quality culture throughout the firm. In TQM, organizations consist of 'quality chains' in which each person or team treats the receiver of their work as if they were an external customer and adopts a target of 'Right First Time' or zero defects.
